

**TVAC 15000B &
TVAC 15010B**

CC00531

The TVAC 15000B package contains everything you need to quickly build a wireless video surveillance at home or in the office (from 1 to maximum of 4 cameras).

The set includes a 2.4 GHz wireless monitor and an IR wireless outdoor camera with PIR motion sensor.

The camera transmits the video signal wirelessly to the monitor. Digital signals means interference is avoided ensuring consistent range and transmission quality. In addition, the data is encrypted to ensure a protected route of transmission.

The TVAC15000's wireless digital transfer enables easy installation even where laying cables is not possible. Offers a wireless range of up to 100m outdoors and up to 40m indoors.
