

TVAC 16000B & TVAC 16010B

The TVAC 16000B package contains **everything you need** to quickly build a wireless video surveillance at home or in the office (from 1 to maximum of 4 cameras).

The TVAC16000B transmits in real time (25 frames per second) and features easy remote viewing from the free Android and Apple App, allowing world wide access.

The camera transmits the video signal wirelessly to the monitor. Digital signals means interference is avoided ensuring consistent range and transmission quality. In addition, the data is encrypted to ensure a protected route of transmission.

The TVAC16000's wireless digital transfer enables easy installation even where laying cables is not possible. Offers a wireless range of up to 150m outdoors and up to 50m indoors.
