

The Crime Shield window security system is manufactured from 2mm thick specially perforated steel plate, finished in external grade polyester powder coat paint, mounted into a two part extruded mitred and welded aluminium frame.

The perforated screen offers protection against unauthorised access to the property through the window, or door, whilst also protecting the glass against blows, rocks or even air gun pellets. For convenience, and easy access for window cleaning, opening units are also available.

Crime Shield has been fitted in many locations including offices, factories, supermarkets, places of worship, public buildings and shops.

Crime Shield is also ideal for use in railway bridge walkways, waiting rooms and bus shelters where savings of up to 30% have been achieved against conventional glazing.

Crime Shield has been tested and evaluated to achieve a number of accreditations. It is a unique security product.

**FIXED BARRIER**  
The economical Fixed Barrier provides protection where an opening barrier is not required

**TECHNICAL DATA**

**Barrier**

2mm thick galvanised steel sheet with a matrix of perforations to provide a 60% free area. Coating - full polyester external grade sandwich locked into two piece aluminium frame system.

**Frame**

Architecturally designed heavy gauge two piece aluminium extrusion: mitred, keyed and welded. Finished in black or white electrostatically applied and baked powder coating - full polyester external grade. Optional frame colours available with relevant colour reference.

**Fixing**

Various options dependent on window type. Most common fixing types are inset mount (between reveals) and face fix direct to window frames, though many other options may be considered.

**Quality**

Crime Shield is manufactured to ISO9002 Quality Assurance with an unconditional 5 year guarantee.

**Integrity**

Crime Shield is rated to LPS 1175 (Category 1).

**Additional Features**

- 1 Insect Screen
- 2 Vibration Damper
- 3 Rear Cover (where applicable)
- 4 Anti-graffiti coating
- 5 Frame cut outs

Crime Shield carries U.S. and European patents.

# Crime Shield is virtually undetectable from inside or out

Crime Shield is the first form of **insurance approved** window security conceived as an architectural product. There are no unsightly iron bars, steel mesh or expanded metal which may not even protect the glass.

Crime Shield doesn't disguise the attractiveness of existing windows and doors whether classical or contemporary, traditional or modern. It is a durable metal screen mounted in front of or behind existing windows. It is not a film or a fly-screen.

Crime Shield unobtrusively protects property and glazing by preventing access to windows. An optional quick release mechanism is available if required for emergency escape.

Manufacture and installation (to all customer requirements) can often be a more economical proposition than frequently replacing the glazing or paying increased insurance premiums.

at close quarters, Crime Shield is a visible deterrent

Crime Shield transmits in excess of 60% of incidental light

Crime Shield window barriers transmit in excess of 60% of incidental light and '60% free area' means plenty of air flow and visibility. The pattern fools the eye into focussing on the exterior view eliminating a 'closed-in' or 'institutional' feeling. Light, Air and Open Views are important aspects in controlling 'personal environment' for occupant comfort.

From a distance Crime Shield merely gives the impression that the windows are fitted with tinted glass; but at close quarters it's a visible deterrent to would-be burglars or glass smashing vandals.
