- IP55 rating for use in all weather conditions
- Comes in flush, surface mount or rain hood options
- IP and PoE technology for easy expansion
- No need for specialist wiring diagrams
- SIP compatible

About - Net2 Entry is a door entry system that works standalone or alongside Paxton's Net2 access control, combining door entry with key features of Net2. Net2 Entry consists of 3 components that auto-detect on set up; external panel, interior monitor and door control unit.

Net2 Entry is a plug and play solution that comes with a range of panel options and is suitable for a wide variety of sites.

The Net2 Entry Standard panel is a robust external panel for use with Paxton's door entry system, Net2 Entry. The panel has an attractive brushed steel effect for a smart appearance and durability. The panel can be mounted onto a metal surface if required.

Operation - A visitor initiates a video call via the bell button on the external panel. Visitor access can be granted via the Net2 Entry monitor, which features an intuitive touchscreen user interface. The internal monitor can be used via either the handset for private calls or in hands free mode.

For staff/ tenants, when connected to Net2, access to the building can be gained by using a PIN, Code and/or proximity token.
