

eCLIQ System: The key to electronic locking

ASSA ABLOY

More durable, more secure and more efficient
than conventional locking systems

The global leader in
door opening solutions

Why choose electronic locking?

"eCLIQ is an a electronic locking system designed to deliver maximum flexibility and enhanced security." – CLIQ® Reseller

Read more in the technical brochure.

Changing organisational structures, the rapid growth in team and project work, and the rise in mobile working are putting enormous pressure on building infrastructure and those responsible for security technology. Designed with this in mind, eCLIQ is the best choice for a more secure future.

Certified CLIQ® specialists will help analyse your individual needs, locking plan development, system design and selection. We offer convenient software packages for planning and subsequent management of an eCLIQ electronic locking system designed to match your current business needs and respond to future requirements.

Questions you need to answer before the planning stage:

- How is your building used?
- What is your organisational structure?
- How strict are your security requirements?
- What other requirements do you have?
- Are frequent changes expected?

eCLIQ is a system of programmable keys and compact, secure locking cylinders, offering you:

- Minimised risks associated with lost keys
- Flexibility to manage constantly changing access requirements
- Enhanced security with CLIQ® chip generation using AES encryption
- Durability due to robust hardware
- Easy installation – no wiring required
- Clear audit trails

eCLIQ: The advanced electronic solution

The electronic advantage: high security

A completely electronic locking system, eCLIQ is based on the mechanical precision and microelectronic modules of ASSA ABLOY's CLIQ® technology.

Secure, reliable and uncomplicated, the powerful microelectronics in the programmable waterproof key and electronic locking cylinder together provide the highest possible security. The eCLIQ system is suitable for the design of locking systems for all types of properties.

Durable cylinders and keys, plus powerful microelectronics

Secure and safe, the powerful microelectronics in the programmable waterproof key and electronic locking cylinder together provide the strongest possible security.

The latest chip generation delivers a high degree of encryption, providing enhanced protection. Updates and changes of access rights can be transferred to the user keys via wall mounted or mobile programmers.

Flexible access control

eCLIQ offers a cost-effective and easy way to assign new access rights, no matter how many times your needs change.

Locking cylinders can be individually programmed with time-limited access, using the programmer and the red programming key, so temporary rights for contractors and external service providers can be assigned quickly and easily. Lost keys no longer pose a security risk, as keys can be revoked electronically at any time.
